

# JOURNEY TO NET ZERO

## WHY DO IT?

- Protect your investments from climate risks
- Take investment opportunities
- Keep up with new policy and regulation
- Meet demand from your members, corporate or clients
- Align with the Paris Agreement to limit global warming by reaching net zero by 2050

### REVIEW

Review your investment strategy and ask your managers and consultants what they're already doing

### EXPLORE

Explore your sponsor organisation's beliefs and net zero plan and incorporate them into your strategy

### DEFINITELY

### PROBABLY

### POSSIBLY

### DECLARE

Declare your beliefs, then set a net zero target and milestones

### ENGAGE

Engage with assets that need encouraging to set their own net zero strategies and reduce emissions

### TILT

Tilt your portfolio towards assets that are aligned with net zero, and away from those that aren't

### PAY

Pay for carbon reductions and removal outside of your portfolio: your corporate could do this

### INVEST TO REDUCE

Invest in climate solutions like renewables and home insulators, which will reduce your carbon intensity in the future

### INVEST TO REMOVE

Invest in things like reforestation and carbon capture, to remove carbon from the air

### DIVEST

Divest assets that won't reduce their emissions in line with your net zero strategy

### NET ZERO

You'll have a net zero emissions pension scheme when all your assets have reduced their emissions as much as possible, then balanced any leftover emissions they have by removing carbon from the air.
